Get started with Philips Hue

Imagine being able to turn off all your lights with one click. Discover the magic of transforming an entire room from study to home cinema with one tap. Or maybe use your lights to make it seem like you are home when actually you are not. And when you are home, choose the right light setting to help you concentrate better or relax after a tough day. From waking up with light, to tucking you in at night. Philips Hue lights your home smarter.

The bulbs and lums

Discover a whole range of lights, sensors and switches that help you light your home smarter. Replace your existing light bulbs with smart bulbs or explore many form-factor lamps and fixtures. Philips Hue offers light for every room in your home.

How it works

Imagine that the minute you get home, your lights turn on to welcome you. No wiring, no electrician and no hassle. These energy-efficient and smart LED lights just plug in and work. Plus, they seamlessly integrate with your favourite smart devices to make your home smart.

Get started

Philips Hue brings smart lighting to everyday homes, allowing anyone to create special moments and automate with light. Start with Philips Hue your way: Bluetooth or Bridge. And no worries: even if you start with a Bluetooth-controlled system, you can always add a Bridge.

Which option is best for you?

How to control your lights

You can control your Philips Hue system from any device, wherever you are. Philips Hue is the only smart lighting brand that works with all the major voice assistants on the market. Configure your system with the app and discover the fun of creating your own scenes and automations. Or go wild with any of the other 700+ Philips Hue apps. From a wall switch that cycles through cool to warm white light to a magic-no-electricity required switch for scenes. Or let a wireless motion sensor do the job.

The easy start to smart light

A Bluetooth-controlled system can control lights within Bluetooth range. Set the mood of a single room with any Philips Hue Bluetooth-compatible bulb and the Philips Hue Bluetooth app, which controls up to 10 lights.

Unlock the full experience

Adding a Philips Hue Bridge activates the built-in Zigbee network — a more advanced way to control your lights — and unlocks the full suite of smart lighting features: add up to 50 bulbs, set routines, and more.

Get started with a Philips Hue Bridge

1.

Install your lighting

Install all lights and turn on the light switches

2.

Make connection

Plug in Philips Hue Bridge and connect it with the Wi-Fi router

3.

Download the Philips Hue app

Follow the instructions to install Philips Hue

4.

Expand

Add more lights and accessories to complete your Philips Hue experience at home

Get started Philips Hue Bluetooth

1.

Install your lighting

Install all lights and turn on the light switches

2.

Download the Philips Hue Bluetooth app

Follow the instructions to install Philips Hue

Voice control

Philips Hue works with Apple HomeKit and the Google Assistant, which means whoever you choose to ask to control your lighting, Philips Hue will respond.

Discover the features

Use voice-control through Siri, or link Philips Hue to other HomeKit enabled accessories in the iOS Home app and take control of your home. All you need is the square-shaped Philips Hue Bridge and an Apple HomeKit-enabled device.

Works with Apple HomeKit

Control your Philips Hue lights and other HomeKit enabled accessories using Siri on your iPhone, iPad or HomePod. Just say: "Hey Siri, turn on the lights". You can also dim to the desired brightness or recall your pre-set scenes. Even tell Siri to set up for a party.

Hands-free lighting experience.

Turning the lights on/off with your voice is only the beginning. Ask Google if you left the lights on, adjust dimming, recall your favorite scenes and much more. Together, Philips Hue and the Google Assistant offer you a simple, convenient solution to control the lights in your home.

Scenes and light recipes

You can set your custom Philips Hue scenes and light recipes with the Google Assistant. To do this, you first need to sync your lights by saying: "Ok Google, Sync my lights". Then ask for your favorite scenes or light recipe.

What is White and color ambiance

Turn your everyday lighting into an extraordinary experience. Play with colors or sync lights with your music, TV and games for an immersive effect. The possibilities are endless once you start exploring. And with hundreds of apps to choose from, the only real limit is your imagination.

From sunrise to sunset

Wake up and go to sleep naturally

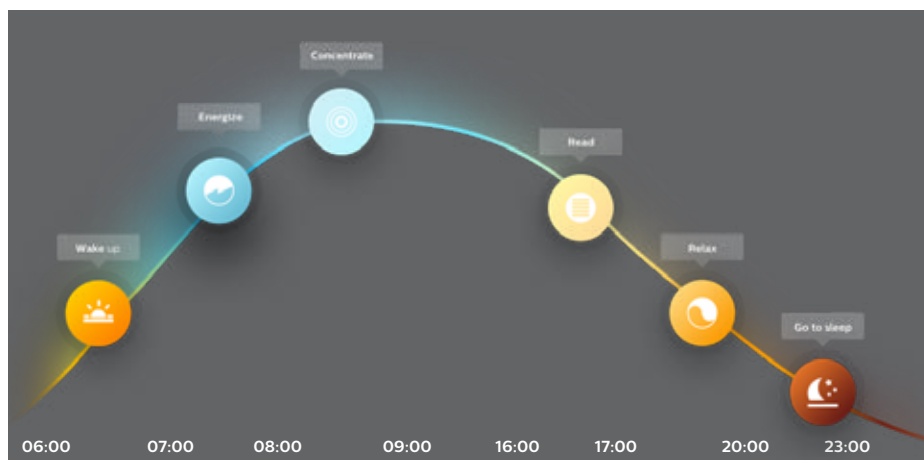

Philips Hue will help get you out of bed the way you like it, helping you start your day feeling refreshed. The light brightness increases gradually mimicking the effect of sunrise and helps you wake up naturally, instead of being woken up by the loud sound of an alarm clock. Start your day, the right way. In the evening, the relaxing warm white light helps you to unwind, relax and prepare your body for a good night's sleep. Requires a Bridge.

Wake up to sunlight every day

Long after you have switched your lights off, they contribute to your well-being. Philips Hue can help you wake up and fall asleep naturally by simulating the effects of early morning and evening light. Our wake up light is gentle unlike the sound of an alarm clock. At bedtime, warm, white LED light relaxes your body, preparing you for a good night's sleep. Requires a Bridge.

Relax, read, concentrate and energize with light recipes

Light influences our mood and behavior. Philips Hue can help you to customize your daily routines into moments you can enjoy. Skip your morning coffee and get ready for the day with cool, bright white daylight that helps to energize your body and mind. Stay focussed with finely tuned bright white light. Or put your feet up and relax with a soft glow of white light for the perfect end of the day.

Wake up and go to sleep naturally

Light has a strong impact on the timing and strength of your sleep and wake rhythm. Synchronizing the need for daylight with artificial light gives you the right light for increased wakefulness and greater well-being. The gradually increasing brightness of white ambiance gives you the feeling you are waking up from natural light - rather than the rude awakening of an alarm. In the evening relaxing warm white light helps you to unwind, relax and sleep better at night.

What is White

Philips Hue welcomes you home and lets you control your lights from your bedroom to your backyard. You can automate your lights completely to make it seem like you are home when you are not. With geofencing technology, your lights can even welcome you home or switch off automatically when you leave your home. It is all about simplifying your life and giving you peace of mind in smart and useful ways.

Philips Hue gives you peace of mind

Lights so smart they welcome you home

Never come home to a dark house again. Set your lights to turn on automatically as you near your home — and turn off when you leave — in the Philips Hue app with Home and Away routines. You can also use the Outdoor sensor to welcome you home with light when it detects your movement.

Make it look like you are home with light

While keeping the house tidy may discourage some burglars, others will notice the lack of activity — namely, the lights. With its simple setup and wireless installation, the Philips Hue White Starter kit is the best way to get started with automating your away-from-home moments. The Philips Hue app allows you to automate your lights so that it looks as though you are going through your daily routines as usual. Set lights to come on in the morning, in the afternoon, and during the evening — sometimes even at random intervals — to mimic your presence and help deter unwanted guests.

Deter unwanted guests

Philips Hue lights are designed with your family's safety in mind. The Outdoor sensor detects movement and automatically turns on the lights — exposing unwanted guests and ensuring that you feel safe in your surroundings. You can also set your lights to mimic your presence and make it seem like you are home while you are away.

Automate your outdoors with light

For an added sense of security, pair your Philips Hue smart lights with an Outdoor sensor. The sensor detects movement and turns on your selected light or lights to potentially scare away an intruder. Because it is able to trigger both indoor and outdoor lights using motion, it is a believable sign that someone is home — even when you are not.

Add a Philips Hue White GU10 or E14 bulb to your system and enhance your home with warm white lighting that you can dim and control remotely. Automate your lights to make it seem like you are home when you are not or set timers.

	EAN	Product
1	8718699628697	Philips Hue White 6W GU10 EU

Enjoy smooth wireless dimming. The Philips Hue wireless dimming kit combines a clever wireless dimmer and a Philips Hue White LED bulb. No installation needed. Just place the switch anywhere you like and use it as a remote control. The wireless dimming kit works without a Bridge.

- Turn on/off or dim your lights
- Screw in the light bulb and turn on the light
- Place it anywhere you need a light switch
- Wireless switch and remote control in one
- Control up to 10 lights at once with one switch
- Both bulb and dimmer switch can be connected to the Philips Hue system

The wireless dimmer can also be purchased separately, and it works with all bulbs and lums in the Philips Hue system.

	EAN	Product
1	8718696785331	Philips Hue White DIM kit 9W A60 E27 EUR

This small LED bulb is made for luminaires too short to accommodate a candelabra bulb. It features a rounded P45 shape that measures about 77 mm high and 45 mm wide, making it small enough to fit in tight spaces yet bright enough to provide lighting for your tasks.

Connect your smallest luminaires — wall, table, or desk lamps, for example — with the Philips Hue White luster P45 E14 bulb. This small bulb offers dimmable warm white light and Bluetooth control in one room. Add a Philips Hue Bridge to unlock the full suite of features.

Get bright lighting for spaces such as the garage or kitchen, as well as softer light for any room, with a Philips Hue White A67 bulb, which offers a powerful 1600 lumen output (equivalent to 100W) and wireless dimming. Connect to a Philips Hue Bridge to unlock the full suite of smart lighting features.

The High Lumen bulb provides a powerful white light that is bright enough to fully illuminate the kitchen, garage, or any other room where you need functional lighting. With 1600 lumen output of brilliant light, it's no surprise that it's Philips Hue's brightest bulb.

Explore lighting that adapts to your life

Philips introduces Philips Hue White ambiance, the light that lets you select the right light level and temperature for each of your tasks and routines.

From helping you to wake up with the right light level on dark winter mornings, to supporting you in staying focused while studying or creating the right light color to let you wind down and relax. Philips Hue White ambiance can do it all, because the color temperature ranges from 2200 Kelvin to 6500 Kelvin. It helps you to relax, read, concentrate or energize even when the sun is not out.

Control your luminaires with the included switch.*
All luminaires with an included switch works without a Bridge.
Cycle through pre-programmed scenes:

*Not included in all products

One room for all your activities

With light that is flexible to create any setting you need from one single light point, you get the opportunity to use the same space for different activities. Choose for warmer light with lower color temperatures to enhance creativity or simply to relax. Brighten up your space with cooler white light to perform functional tasks and feel energized.

Luminaires

Phillips Hue Luminaires combine the better of the two Philips worlds. Some of our most popular luminaires combined with Philips Hue White ambiance integrated LED and a Switch. Enabling you to have the perfect light for every moment through Philips Hue White ambiance and connect, control and dim your lights wirelessly. Or why not try our our four pre-programmed scenes (relax, concentrate, reading and energize)?

Get both functional and mood lighting in a single fixture. The Centris has a fixed ceiling light and four spot lights that can be angled individually. Set each light in the fixture to any of millions of colors for a truly unique look.

The Philips Hue Centris blends function with aesthetics in a ceiling light that combines a central fixture with spot lights that can be individually angled to highlight different parts of the room. Set the Centris to one of millions of colors or any shade of warm-to-cool white light — or set each light in the lamp to its own individual shade for a livelier look.

Bathroom

Philips Hue Struana
With included switch

White ambiance

Light for
your moments
from sunrise to sunset

Get the maximum out of your bathroom with the Philips Hue Struana ceiling lamp. Depending on the moment, it helps you to energize, concentrate, read or relax. It has an IP44 level.

This bathroom light is especially designed for humid environments. It was tested rigorously to ensure its water resistance. The IP level is described by two figures: the first one refers to the protection level against dust, the second against water. This bathroom light is designed with IP44: it is protected against splashing water. This product is most commonly used and ideal for the bathroom.

Early morning hours call for precision and concentration. With finely tuned bright white light you can go through your morning rituals with ease, whether it is to give your make-up that perfect finish or groom your beard neatly.

High-quality light and design

- High light output
- IP44, perfectly suited for your bathroom

Light for your moments

Enjoy longer evenings outside, finish yard work or just bring the garbage outside after sunset. Have your Philips Hue lights turn on automatically by setting schedules or use the sunset/sunrise routine. And of course, you can also turn off or dim your lights this way. You will never again have to worry whether you have left any lights on.

Outdoor low-volt

Philips Hue Impress

Plug in and light up your outdoors

Make an impression with the Impress low-voltage luminaires. This modern glass-enclosed wall luminaires only needs a wall socket to give you dusk-till-dawn light in any of 16 million colors.

Brighten up dark paths, create highlights in your landscaping, or create a unique ambiance on the patio. You can do it yourself, using Philips Hue spots or bollards. The products are based on low voltage, safe to use and easy to install. No more complexity to get lighting outdoors: go create and extend as you like.

Philips Hue Motion Sensors

Philips Hue Motion Sensor is battery powered and completely wireless, you can place the Philips Hue Motion Sensor anywhere in your home.

Easily configured via the Philips Hue app, through which you have the freedom to choose which scene or light setting you want triggered when motion is detected.

It is even possible to set different light settings for night and day – the sensor will automatically adjust the brightness of the light according to what time it is.

Thanks to an integrated light sensor, Philips

Hue Motion Sensor helps you save energy by automatically turning off lights in areas of your home that are not being used.

The Philips Motion Sensor was developed for convenience, peace of mind and energy saving.

Try the new Outdoor sensor for your lights. Set it to automatically turn on your indoor or outdoor light when someone passes by.

Philips Hue Smart plug

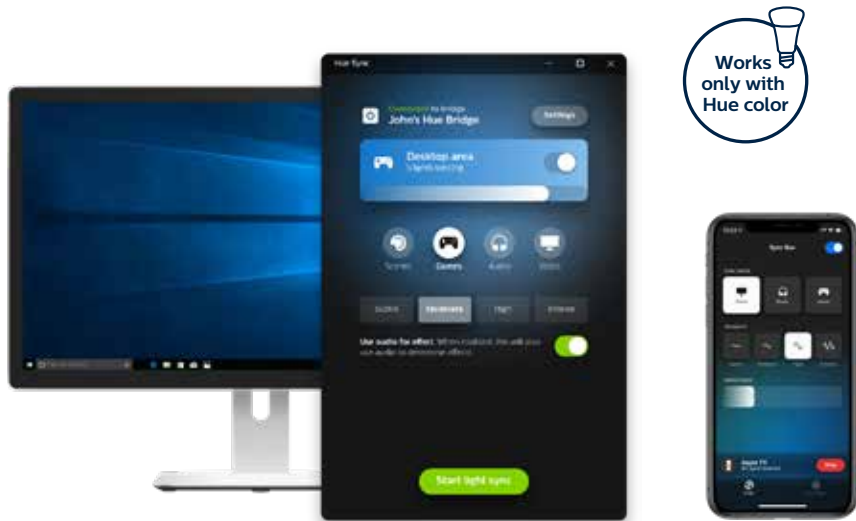

This small, unassuming accessory allows you to turn any light — even one in which you can not place a Philips Hue bulb — into a smart light so that you can control it via the Philips Hue app or voice. Use Bluetooth for instant light control or connect to the Philips Hue Bridge to unlock more features.

The Philips Hue Smart plug is designed to blend into any environment. Small, white, and with a subtle design, the Smart plug allows you to add any light to your Philips Hue system without any added wires or hassle.

Sync your lights with movies, music and games

There are two ways to sync your color-capable Philips Hue smart lights to your media:

1. Use the Philips Hue Sync desktop app to sync your lights to the content on your computer.
2. Use the Philips Hue Play HDMI Sync Box to sync your lights to the content on your TV screen in your home theater.

Philips Hue Sync for desktop

Highlight and amplify your in-game actions with your smart lights. Whether you are unlocking an achievement or beating a boss, you can experience lighting effects that correspond to what is going on in your character's world.

Using the Philips Hue Sync desktop app is not only for gaming: from watching your favorite streaming service to listening to the latest chart topper, you can pair your lights with whatever is happening on your computer.

Download Philips Hue Sync desktop app for free on philips-hue.com

Enhance films and games

The Philips Hue Sync application creates a light script for your lights based on the content that you watch or play. Via screen grabbing and a smart color algorithm, it matches your Philips Hue lights to on-screen action in real-time.

Match with music

Philips Hue Sync listens to the beat and type of song, creating a light script on the fly to match the music you are listening to. Immediate and without a delay, enjoy slow dynamic effects or customize the intensity of the effects as you prefer.

Fine tune your experience

Adjust the brightness level to control the intensity of the light effect.

Immersion control

Choose between different modes of immersion, from normal to intense, to personalize the experience.

Mode change

Change colors or white tones via the presets and create the light setting that perfectly matches your entertainment experience.

Philips Hue Play HDMI Sync Box

1

Philips Hue Play HDMI Sync Box

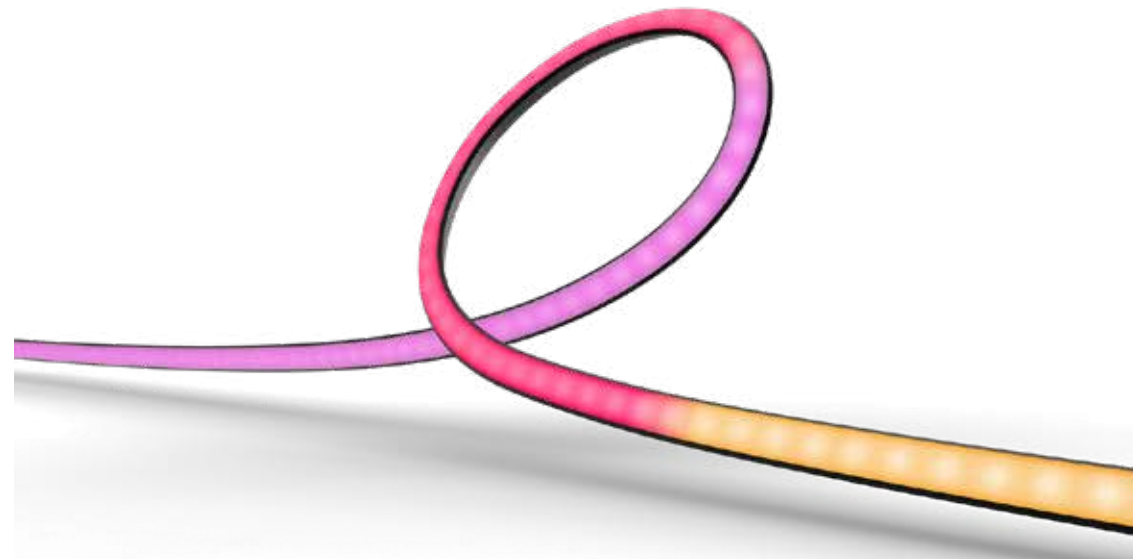

Sync your smart lights to the content on your TV screen with the Philips Hue Play HDMI Sync Box. Four HDMI ports allow you to connect your media devices to your Philips Hue setup, resulting in a fast, seamless display of colorful smart light that responds to and reflects the content you watch or listen to.

Supporting up to 4K, the sync box features one output that connects to your TV and four HDMI inputs that allow you to connect media devices, such as gaming consoles or streaming devices, to sync to your Philips Hue system. The sync box detects which device is actively playing on your TV screen and automatically switches to it. Configure these and other settings in the Philips Hue Sync mobile app or by using the button on the sync box.

Download Philips Hue Sync for mobile for free on [App Store](#) and [Google Play](#)

EAN	Product
8718699704803	Philips Hue Play HDMI sync box

Experience the thrill of the theater at home with the Philips Hue Play gradient lightstrip. Get multiple colors of light that react to the content on your screen.

The Play gradient lightstrip comes in three sizes. The 55-inch lightstrip is recommended for 55 to 60-inch TVs, the 65-inch lightstrip for 65 to 70-inch TVs, and the 75-inch lightstrip for 75-inch and larger TVs. If the size of your TV falls in between these recommendations, use the next size down (for example, a 62-inch TV would use the 55-inch lightstrip).

- Seamlessly Blend Colors
- Surround Lighting Effects
- Game Changing Home Entertainment
- Easy Installation
- Philips Hue Sync box and Philips Hue Bridge Required
- Three sizes for a perfect fit

Get a seamless blend of multiple colors of light at the same time in a single LED strip. The colors flow together naturally, casting light against the wall to showcase a unique effect behind your TV.

The Philips Hue Play gradient lightstrip requires the Philips Hue Play HDMI sync box, Philips Hue Sync mobile app, and a Philips Hue Bridge. The Bridge also allows you to add up to 50 lights and accessories throughout your entire home, create timers and routines, and control your lights from anywhere — inside or outside your home — with the Philips Hue app. The Philips Hue Play HDMI sync box and Philips Hue Bridge are sold separately.
